

Gain valuable experience on the Global Graphics Software Graduate Program

Become a software engineer with valuable skills and industry-recognized knowledge

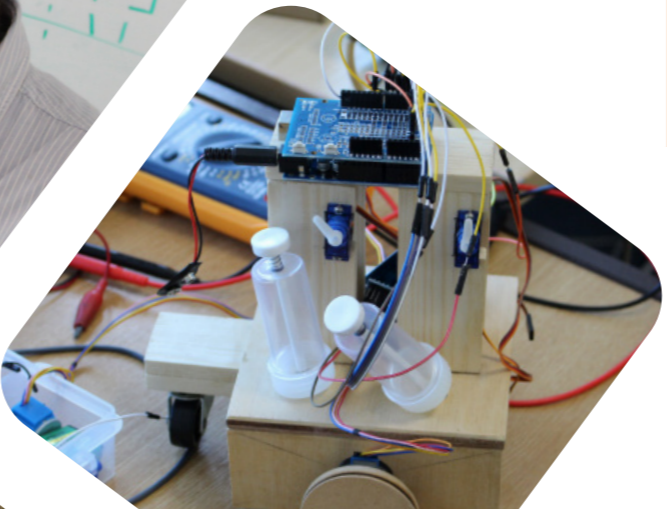

Embark on a stimulating career by entering the Graduate Program at Global Graphics Software. You'll gain the experience you need to become a software engineer with valuable skills and industry-recognized knowledge.

A one-year program, you will be based at our main R & D facility just outside Cambridge, UK. You will work with, be trained and mentored by some of the world's leading experts in their field. Their innovation and ability to problem-solve is highly prized by our customers who include some of the world's leading brands, including HP, Canon, Kodak, Agfa, Roland and Ricoh.

We encourage innovation and every month take time out to play with new technologies in The Shed, a creative environment where you are free to work on projects to learn new skills, research new frameworks and bring your ideas to life.

The day begins with free breakfast for everyone and there's plenty of fresh fruit, drinks and the occasional lunch. Dress how you like - we want everyone to feel comfortable and to make coming to work an enjoyable and pleasant experience.

We also enjoy social events and some of us even take part in local and national sporting events.

Minimum Requirements

A demonstrable passion for software development.

Your graduate program

This program contains both quality assurance and customer support disciplines. It's the best way to learn about our products, customers and market. Plus, it's an ideal stepping stone to other key roles in the company like product management and product development.

Engineer with industry-recognized knowledge, capable of working in Test, Development or Support.

You will be developing software at all stages of the program which is split into the following:

And at the end of the program you'll have progressed from being a Graduate Software Engineer to an experienced and valuable Software

Induction, and graduate program project		
<ul style="list-style-type: none"> Understand Agile software methodology <ul style="list-style-type: none"> Use Jira Estimation Programming in C/C++ or C# <ul style="list-style-type: none"> Build systems 		
Assignment in Test	Assignment in customer support	Assignment in Development
<ul style="list-style-type: none"> Become a member of the Scrum team and attend regular team stand-ups <ul style="list-style-type: none"> Writing test plans Executing test plans Designing test strategies <ul style="list-style-type: none"> Test automation Software development in Test 	<ul style="list-style-type: none"> Customer interaction (our customers are developers) <ul style="list-style-type: none"> Analysis of reported issues Trace problems into the product code and suggest fixes 	<ul style="list-style-type: none"> Software design <ul style="list-style-type: none"> Develop new features Test-Driven Development (TDD) <ul style="list-style-type: none"> Code reviews Software documentation Windows and Linux development <ul style="list-style-type: none"> Microsoft Azure

Personal Mentor

You will be assigned a mentor who will help you to understand our processes and the value of development, quality assurance and support best practices to the customer.

Working at Global Graphics Software

Join Global Graphics Software and you'll be a part of a multi-award winning team. In 2020, we received the prestigious Queen's Award for Enterprise: Innovation.

We are a member of the fast-growing Hybrid Software Group PLC, who share our Cambridge headquarters.

Our main development facility in Cambourne near Cambridge, UK, is open plan with quiet areas, plenty of meeting spaces and a pleasant relaxing area. The beautifully landscaped surroundings with lakes and nature walks are also great to explore.

We're working in exciting new markets for industrial inkjet where our technology developments are enabling the development of new products such as digitally printed textiles and wall coverings, product decoration or packaging, and a whole host of personalized goods from shoes to drinks cans. We are helping our partners to become pioneers in inkjet printing for Industry 4.0.

Our technologies are also used in new 3D/Additive printing devices and to drive lasers marking on surfaces.

We're an established company with roots that go back to 1986. In addition to our office near Cambridge, we have offices near Sarasota, Florida and in Tokyo.
